

Zhengshou Lai - Curriculum Vitae

Ph.D., Associate Professor, Doctoral Supervisor | School of Civil Engineering, Sun Yat-sen University

Email: laizhengsh@mail.sysu.edu.cn | **Phone:** +8619866038070

Academic Profiles: [Google Scholar](#) | [ResearchGate](#) | [ORCID](#)

Dr. Zhengshou Lai is an Associate Professor and Doctoral Supervisor at the School of Civil Engineering, Sun Yat-sen University, and a dual-appointed faculty member at the Research Center for Applied Mathematics, Hong Kong Advanced Research Institute. He received his Ph.D. in Civil Engineering from Clemson University, USA, in 2018, and his Bachelor's degree from Sun Yat-sen University. Selected for the Hong Kong Scholars Program in 2020, he conducted postdoctoral research at Sun Yat-sen University and the Hong Kong University of Science and Technology from 2019 to 2023.

Dr. Lai's research focuses on multiscale computational mechanics of granular media, with an emphasis on developing advanced numerical algorithms and high-performance computing software for multi-physics simulation of complex granular systems. He has made systematic contributions to discrete element modeling and contact algorithms for irregular-shaped particles based on geometric descriptors including Fourier series, poly-Bézier curves, and signed distance fields. His recent work concentrates on fluid-solid coupling multiscale simulation frameworks (CFD-DEM), machine learning-enabled discrete element methods, and data-driven digital twin technologies for granular materials. His research provides theoretical foundations and computational tools for critical engineering problems including deep-sea mining, subseabed carbon sequestration, and multiscale modeling and uncertainty quantification of transportation infrastructure.

Dr. Lai serves as a reviewer for international journals including *Computers and Geotechnics*, *Acta Geotechnica*, and *Granular Matter*. His research has been supported by the National Natural Science Foundation of China, Guangdong Provincial Natural Science Foundation, and China Postdoctoral Science Foundation.

Research Interests

Computational geomechanics; Discrete element method; Fluid-solid coupling multiscale simulation; Machine learning and data science; Computational mechanics of granular materials; Software development

Education

- **Clemson University, USA**, Ph.D., Civil Engineering, 2015.01-2018.12
- **Sun Yat-sen University, China**, Direct Ph.D. Student (No Degree Awarded), Engineering Mechanics, 2012.09-2014.06
- **Sun Yat-sen University, China**, Bachelor, Transportation Engineering, 2008.09-2012.07

Work Experience

- **Sun Yat-sen University - School of Civil Engineering**, Associate Professor, 2023.03-Present
- **Sun Yat-sen University - Hong Kong Advanced Research Institute, Research Center for Applied Mathematics**, Dual-appointed Faculty, 2025.12-Present
- **Hong Kong University of Science and Technology - Department of Civil and Environmental Engineering, Sun Yat-sen University - School of Intelligent Engineering**, Postdoctoral Fellow ("Hong Kong Scholars" Program, selected 2020), 2021.02-2023.02
- **Sun Yat-sen University - School of Intelligent Engineering**, Postdoctoral Fellow, 2019.02-2021.02
- **Idaho National Laboratory, USA**, Research Intern, 2018.06-2018.12

Teaching

- Engineering Drawing and CAD; Advanced Computational Mechanics; Computational Methods for Discrete Media

Professional Skills

- Multiscale Simulation; Numerical Algorithm and Software Development; Computational Mechanics; Granular Media Simulation; Finite Element/Discrete Element Methods

Research Projects

Funded Research

- **Guangdong Provincial Department of Science and Technology, General Project (PI)**; Research on Gas-Liquid-Solid Multiphase Flow Mechanism and Coupled Numerical Methods in Hydrate Solid Fluidized Mining; 2026.01-Present (¥100,000)
- **Guangdong Provincial Department of Science and Technology, Major Basic Research Project (Participant)**; Multi-field Multi-scale Dynamic Coupling Disaster Mechanism and Mitigation of Offshore Wind Power Platforms under Extreme Marine Environment; 2025.09-Present (¥5,000,000)
- **Guangdong Provincial Department of Science and Technology, Guangdong-Hong Kong S&T Innovation Joint Funding Special Topic (PI, mainland lead; publicly announced for funding)**; Damage Evolution and Failure Prediction of Submarine Cables under Complex Marine Dynamic and Geological Coupling Conditions; 2026.01-2027.12 (Total ¥2,000,000; ¥1,000,000 government + ¥1,000,000 matching; No. 34 on the 2026 provincial S&T special fund proposed list)
- **State Key Laboratory of Mountainous Civil Engineering Safety and Resilience, Open Project (PI)**; Peridynamics-DEM Coupled Simulation and Disaster Response Mechanism of Rock Mass Dynamic Fracture in Mountainous Areas; 2025-Present (¥60,000)
- **National Postdoctoral Management Committee Office and Hong Kong Scholars Association, “Hong Kong Scholars” Program Project (PI)**; Multiscale Simulation of Granular Media; selected 2020, executed 2021.02-2023.02 (¥660,000)
- **National Natural Science Foundation of China, Youth Project (PI)**; Macro-micro Mechanical Testing and Multiscale Discrete Element Modeling of Calcareous Sand Based on CT Images and Machine Learning; 2020.01-2022.12 (¥250,000)
- **China Postdoctoral Science Foundation, General Project (PI)**; Research on Discrete Element Method for Irregular Particles Based on Fourier Series; 2020.01-2021.12 (¥120,000)
- **University Basic Research Funding, Young Teacher Development Project (PI)**; Intelligent Detection and Health Assessment of Transportation Infrastructure Based on Computer Vision; 2020.01-2021.12 (¥150,000)

Industry Projects

- **Institute of Mechanics, Chinese Academy of Sciences (PI)**; Contact Algorithm Development for Non-spherical Particles; 2025-Present (¥180,000)
- **China Railway 18th Bureau Group Municipal Engineering Co., Ltd. (PI)**; Deformation Behavior and Early Warning Control Technology for Deep Foundation Pit Construction in Deep Saturated Silt Strata of Metro Stations; 2024-Present (¥1,600,000)
- **Guangzhou North Second Ring Traffic Technology Co., Ltd. (PI)**; Pavement Wetness State Perception and Safety Early Warning System Application Research; 2023-Present (¥750,000)

Honors and Awards

- **2026**; Key Technologies and Applications of Intelligent Sensing and Multi-Physical-Field Simulation for Transportation Infrastructure, Science and Technology Award of Guangdong Civil Architecture Society, Second Prize
- **2025**; A Monitoring Device and Method for Zonal Disintegration of Deep Rock Mass, 25th China Patent Award, Silver Award

- **2025**; Key Technologies and Applications for Disaster Prevention and Control of Rock-Structure Interaction System in Water-rich Underground Engineering, Science and Technology Progress Award of Chinese Society for Rock Mechanics and Engineering, First Prize
- **2025**; Practice of Engineering Graphics Courses in Cultivating Innovation Ability of Students in Comprehensive Universities, Guangdong Provincial Outstanding Teaching Achievement Award (Higher Education), First Prize
- **2025**; *Computers and Geotechnics* Top Reviewer 2025 Award (Elsevier journal annual outstanding reviewer)
- **2024**; Testing Equipment and Anti-seepage Key Technologies for Fractured Rock Mass Seepage in Underground Engineering, Guangdong Province Technology Invention Award, First Prize
- **2024**; High-performance Grouting Reinforcement and Safety Control Technology for Weak Strata in Water-rich Environments, Science and Technology Award of Guangdong Civil Architecture Society, Second Prize
- **2023**; Performance Evolution Theory and Safety Control Technology for Soft Soil-Urban Tunnel Coupling System, Guangdong Province Science and Technology Progress Award, First Prize
- **2023**; Damage Evolution Theory and Dynamic Control Technology for Soft Soil-Urban Tunnel Coupling System, Shenzhen Science and Technology Progress Award, First Prize
- **2023**; CFD-DEM Industrial Software Development and Simulation Technology Application for Multi-field Multiphase Processes, Second National Postdoctoral Innovation and Entrepreneurship Competition, National Finals Winner, Outstanding Postdoctoral Fellow
- **2023**; Ideological Guidance and Industry-Education Integration: A Teaching Model for Cultivating “Creativity” in Engineering Graphics for Students in Comprehensive Universities, 11th Sun Yat-sen University Undergraduate Teaching Achievement Award, Grand Prize
- **2020**; “Hong Kong Scholars” Program (National Postdoctoral Management Committee Office and Hong Kong Scholars Association), Selected
- **2020**; Key Technologies for Engineering Geological Investigation and Collapse Early Warning in Carbonate Rock Areas Based on Karst Development Mechanism, Guangdong Province Science and Technology Progress Award, Second Prize
- **2020**; Key Technology and Application of Dynamic Sensing and Control of Mechanical Behavior Evolution of Geotechnical-Underground Structure Coupling System, Guangdong Province Mechanics Society Science and Technology Award (Invention), First Prize

Students Supervised

Graduate Students

Current

- Saierjide (M.S., 2026–Present)
- Mingjing Liu (M.S., 2025–Present)
- Jianying Chen (Ph.D., 2024–Present, co-advised)
- Kexiao Lin (M.S., 2024–Present)
- Ye Liu (M.S., 2024–Present, co-advised)

Graduated

- Chenghao Li (Ph.D., 2026, co-advised) — Fluid-Solid Coupling Methods Accounting for Real Particle Morphology and Their Application to Filter-Cake Formation Simulation of Shield Slurry; currently Laboratory Technician at the College's National Key Laboratory
- Haoyong Ye (M.S., 2026) — Study on the Mesoscopic Mechanism of Gravel-Pack Sand Control Based on CFD-DEM
- Ziqi Guo (M.S., 2026, co-advised) — Research on the Dynamic Characteristics and an Elastoplastic Constitutive Model of Marine-Continental Transitional Soft Clay in the Pearl River Delta under Cyclic Loading
- Shuai Huang (Ph.D., 2023, co-advised) — Discrete Element Methods for Coral Sand Considering Real Particle Morphology; currently Associate Researcher at the College's National Key Laboratory (formerly Postdoctoral Fellow at the Hong Kong Polytechnic University)
- Beiye Liang (M.S., 2020, co-advised) — Experimental Study on Microbial Cementation of Calcareous Sand in Artificial Seawater Environment on South China Sea Islands; CITIC Securities
- Feng Wu (M.S., 2020, co-advised) — Experimental and DEM Study on Particle Breakage of Island Reef Coral Sand Considering Real Microstructure
- Shuai Huang (M.S., 2019, co-advised) — Energy-based Slope Stability Analysis Considering Spatially Variable Soils and Its Application on High Slopes at Metro Vehicle Depot Vicinity; pursued Ph.D. in the group
- Wen Ye (M.S., 2019, co-advised) — Effect of Particle Shape and Size on Granular Materials

Undergraduate Students (Thesis Supervision)

- Yuzhou Lu (Class of 2023, in progress)
- Haoqin Zhang (2026, co-advised) — Study on the Mechanical Characteristics of Flow Around a Flexible Fiber under Different Fixed-Position Constraints (jointly supervised with Prof. Yu Guo, Zhejiang University; SYSU Outstanding Undergraduate Thesis); recommended for graduate study at Zhejiang University
- Haofeng Lin (2022) — Simulation and Experimental Verification of Granular Mechanical Behavior Based on Self-developed DEM Program NetDEM; graduate studies at School of Materials, SYSU
- Zhenyuan Li (2022) — Simulation and Verification of Granular Mechanical Behavior and Angle of Repose Tests
- Xiaojian Chen (2021) — Study on Particle Morphology and Mechanical Characterization of Coral Sand in the South China Sea; ZWSOFT
- Huiran Zhang (2021) — Research on Bio-cementation Technology of Coral Sand in the South China Sea Based on Marine Environment
- Zhanxiang Pan (2020) — Reliability Analysis of Slope Engineering Based on Geotechnical Parameter Random Fields

- Yujia Zhang (2020) — Stability Analysis of Submarine Slopes in the South China Sea Considering Wave Dynamic Loading
- Minghui Ke (2019) — Study on the Effect of Particle Size on Strength and Deformation Characteristics of Sandy Soil

Student Recruitment and Collaboration

Recruiting doctoral and master's students in geotechnical engineering/engineering mechanics. Welcome students interested in computational mechanics.
